- minute computer generated DVD produced at the National Center for Supercomputing Applications (2013).
39. M. Ruiz, V. Paschalidis and S.L. Shapiro, *The Pulsar Spin-Down Luminosity: Simulations in General Relativity*, a 3:23 minute computer generated DVD produced at the Department of Physics, UIUC (2014).
 40. R. Gold, V. Paschalidis, Z. B. Etienne, S.L. Shapiro and H. P. Pfeiffer, *Accretion Disks Around Binary Black Holes of Unequal Mass: GRMHD Simulations Near Decoupling*, a 21.12 minute computer generated DVD produced at the Department of Physics, UIUC (2014).
 41. R. Gold, V. Paschalidis, Z. B. Etienne, S.L. Shapiro and H. P. Pfeiffer, *Accretion Disks Around Binary Black Holes of Unequal Mass: GRMHD Simulations of Post-decoupling and Merger*, a 6:21 minute computer generated movie produced at the Department of Physics, UIUC (2015).
 42. V. Paschalidis, M. Ruiz and S.L. Shapiro, *Relativistic Simulations of Black Hole-Neutron Star Coalescence: The Jet Emerges*, a 6:35 minute computer generated movie produced at the Department of Physics, UIUC (2015).
 43. S.L. Shapiro, *Compact Binary Mergers as Multimessenger Sources of Gravitational Waves*, a 36:00 minute *Kavli Special Plenary Talk* presented at the April APS meeting celebrating the 100th anniversary of Einstein's theory of general relativity; Baltimore, Maryland, April 13, 2015; available on the APS YouTube channel: (<https://www.youtube.com/watch?v=kt7B6FKMCeA>)
 44. V. Paschalidis, M. Ruiz and S. L. Shapiro, *Binary Black Hole Merger Simulation: LIGO Source GW150914*, computer generated movies produced at the Department of Physics, UIUC (2016).
 45. M. Ruiz, R. Lang, V. Paschalidis and S. L. Shapiro, *Binary Neutron Star Mergers: A Jet Engine for Short Gamma-Ray Bursts*, computer generated movies produced at the Department of Physics, UIUC (2016).
 46. L. Sun, V. Paschalidis, M. Ruiz and S. L. Shapiro, *Magnetorotational Collapse of Supermassive Stars: Black Hole Formation and Jets*, computer generated movies produced at the Department of Physics, UIUC (2017).
 47. M. Ruiz and S. L. Shapiro, *GRMHD Simulations of Prompt-Collapse Neutron Star Mergers: The Absence of Jets*, computer generated movies produced at the Department of Physics, UIUC (2017).
 48. A. Khan, V. Paschalidis, M. Ruiz and S. L. Shapiro, *Disks Around Merging Binary Black Holes: From GW150914 to Supermassive Black Holes*, computer generated movies produced at the Department of Physics, UIUC (2017).
 49. M. Ruiz, S. L. Shapiro and A. Tsokaris, *Jet Launching from Binary Black Hole-Neutron Star Mergers: Dependence on Black Hole Spin, Binary Mass Ratio and*

Magnetic Field Orientation, computer generated movies produced at the Department of Physics, UIUC (2018).

50. M. Ruiz, A. Tsokaros, V. Paschalidis and S. L. Shapiro, *Effects of Spin on Magnetized Binary Neutron Star Mergers and Jet Launching*, computer generated movies produced at the Department of Physics, UIUC (2019).
51. L. Sun, M. Ruiz and S. L. Shapiro, *Simulating the Magnetorotational Collapse of Supermassive Stars: Incorporating Gas Pressure Perturbations and Different Rotation Profiles*, computer generated movies produced at the Department of Physics, UIUC (2019).
52. A. Tsokaros, M. Ruiz, L. Sun, S. L. Shapiro and K. Uryu, *Dynamically Stable Ergostars Exist: General Relativistic Models and Simulations*, computer generated movies produced at the Department of Physics, UIUC (2019).
53. A. Tsokaros, M. Ruiz, S. L. Shapiro, L. Sun and K. Uryu, *The Great Impostors: Extremely Compact, Merging Binary Neutron Stars in the Mass Gap Posing as Binary Neutron Stars*, computer generated movies produced at the Department of Physics, UIUC (2019).
54. M. Ruiz, A. Tsokaros and S. L. Shapiro, *Magnetohydrodynamic Simulations of Binary Neutron Star Mergers in General Relativity: Effects of Magnetic Field Orientation on Jet Launching*, computer generated movies produced at the Department of Physics, UIUC (2020).
55. M. Ruiz, V. Paschalidis, A. Tsokaros and S. L. Shapiro, *Black Hole-Neutron Star Coalescence: Effects of the Neutron Star Spin on Jet Launching and Dynamical Ejecta Mass*, computer generated movies produced at the Department of Physics, UIUC (2021).
56. M. Ruiz, A. Tsokaros and S. L. Shapiro, *Jet Launching from Merging Magnetized Binary Neutron Stars with Realistic Equations of State*, computer generated movies produced at the Department of Physics, UIUC (2021).
57. A. Tsokaros, M. Ruiz, S. L. Shapiro and K. Uryu, *Magnetohydrodynamic Simulations of Self-Consistent Rotating Neutron Stars with Mixed Poloidal and Toroidal Magnetic Fields*, computer generated movies produced at the Department of Physics, UIUC (2022).
58. L. Sun, M. Ruiz, S. L. Shapiro and A. Tsokaros, *Jet Launching from Binary Neutron Stars: Incorporating Neutrino Transport and Magnetic Fields*, computer generated movies produced at the Department of Physics, UIUC (2022).
59. A. Tsokaros, M. Ruiz, S. L. Shapiro and V. Paschalidis, *Self-Gravitating Disks Around Rapidly Spinning, Tilted Black Holes: General Relativistic Simulations*, computer generated movies produced at the Department of Physics, UIUC (2022).
